

Train both small and large maintenance teams regardless of location with our MPulse University Six/60 program. You'll receive a course orientation, six recorded training sessions and a live recap where you and your team can ask questions relevant to the course curriculum

MPulse University Six/60 covers all the MPulse basics your team members need. As an extra bonus, your training package includes MPulse Testing & Certification for one user, with the option to add more.

MPulse University Six/60 orientation and curriculum are available for viewing 24 hours a day in the MPulse University Portal. Recordings are available for 12 months after purchase. The live recap is delivered the 1st and 3rd Friday of every month barring Holidays or unforeseen scheduling conflicts.

MPulse University Six/60 is a great training option for organizations that need...

- An introduction to MPulse or refresher training
- Affordable training for smaller budgets
- The ability to access content on their schedule
- Limited special topics tailored to meet specific requirements
- MPulse Testing & Certification

A successful maintenance management program requires more than just great software. You need well-trained people who know how to use it.

Contact us to find out how MPulse Maintenance Software's professional training services can markedly accelerate your success.
